

Bashar Essam

Backend PHP Developer | Laravel (+5 Years Experience)

Riyadh, Saudi Arabia | [+966507405738](tel:+966507405738) | basharessam4@gmail.com | [GitHub](#) | [LinkedIn](#)

Transferable Iqama

PROFESSIONAL SUMMARY

Backend PHP Developer with over 5 years of experience specializing in **Laravel**, **RESTful API** development, and **MySQL** database management. Experienced in building scalable, secure backend systems including **ERP**, **POS**, and management platforms. Strong knowledge of authentication, API integration, and performance optimization.

TECHNICAL SKILLS

- **Backend Development:** PHP, Laravel, MySQL.
- **Frontend Technologies:** HTML, CSS (Bootstrap), JavaScript, jQuery, AJAX.
- **API & Integrations:** RESTful API Design, PayPal, Stripe, Mailgun, Twilio, Google AdSense.
- **Tools & Patterns:** Composer, Repository Pattern, Observer Pattern.
- **Soft Skills:** Problem-solving, Adaptability, Clean Code Practices.

PROFESSIONAL EXPERIENCE

Backend Web Developer | Freelancer | *March 2021 – Present*

- Developed and maintained robust backend applications using **PHP** and **Laravel**.
- Designed and implemented secure **RESTful APIs** for web and mobile applications.
- Integrated high-level third-party services including **PayPal**, **Stripe**, **Mailgun**, **Twilio**, and **Google AdSense**.
- Implemented complex authentication and authorization systems to ensure data security.
- Optimized application performance and database queries using **MySQL** for high-traffic solutions.
- Delivered scalable backend solutions for both startups and enterprise-level clients.

Full-Stack Web Developer | Creativo | *January 2021 – March 2021*

- Contributed to the development of responsive web applications using **HTML**, **CSS**, **Bootstrap**, and **jQuery**.
- Enhanced user experience and system performance through dynamic **AJAX** implementations.
- Developed backend features using **PHP** and **MySQL**, adhering to **Object-Oriented Programming (OOP)** principles.
- Collaborated with development teams to analyze requirements, debug issues, and deliver functional solutions.
- Improved application reliability by applying industry best practices in web development.
